# HW13

Goal

- Demonstrate
  - Create a Bound Service
  - Interact with the service
  - Play music with MediaPlayer
- Description
  - "bind service" button binds to the service
  - "unbind service" button unbinds from the service
  - "Play" button starts to play music, and becomes "Pause" button
  - "Pause" button pauses the music, and become "Play" button
  - "STOP" button stops the music
  - If not playing, "Stop" button toasts an error message
  - If click "Play" or "Stop" button when not bound, toast error message

Guidelines

- Play music in Bound Service

- Use service methods to control the music

- Use MediaPlay's start(), stop(), pause(), isPlaying()

- by 11/30, 2pm, submit compressed src
